

NEW NAME, NEW OFFICE

Following a company restructuring exercise and a change of name, Germany based Asahi Machinery Europe GmbH has now also moved to new offices. The new facility has allowed the company to triple the amount of spare parts they hold in stock. With this increase in stock, the company has recently appointed Frank Schumann as a senior service technician. "With many years experience in PLC and servo technology for the paper and packaging industry, Mr Schumann is a welcomed addition to the service team," explains Robert Schaeffer, Sales Manager - Europe.

As well as the full company restructuring, Asahi Machinery Europe has significantly expanded its sales network throughout the region. Marcel Termaat of CorruSystems has been appointed to look after the Netherlands and the Czech Republic (mtermaat@corrusystems.nl). Looking after the Italian market is Marco Visani of Logics srl (marco.visani@logics.it) and since the beginning of this year, Tunc Erman of Meridyen Makina is handling the Turkish market (terman34@gmail.com).
